Office Action Summary

Art Unit: 1762

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-6, drawn to method, classified in class 427, subclass 256.
- II. Claims 7-9, drawn to guide, classified in class 226, subclass 196.1.
- III. Claim 10, drawn to coating apparatus, classified in class 118, subclass 209.

2. The inventions are distinct, each from the other because of the following reasons: Inventions I and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can be used for another and materially different process including applying coatings to objects not having a band shape, e.g. sheets, 3-dimensional objects, electronic wafers, etc.

3. Inventions II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination

Art Unit: 1762

as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the apparatus guide does not require at least the tapered surfaces required by the guide of group II. The subcombination has separate utility such as being used as a guide for adhesive bonding for laminating paper; to guide webs, sheets, etc towards a cleaning or abrading process.

4. Inventions I and II are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the guide apparatus can be used for another and materially different process such as guiding sheets or webs for a cleaning or abrading process.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1762

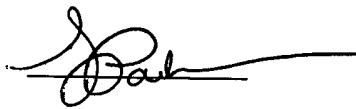

6. A telephone call was not made to David Brinkman on 4/21/03 to request an oral election to the above restriction requirement, because of the complexity of the issues

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).
